THE TRICERATOPS

Horno

(Adobe oven)

The Beehive Shaped oven, built with adobe bricks, is common in Hispanic and Pueblo communities in the American Southwest.

Building a horno is considered an art.

Butterflies are very colorful insects. The colors on their wings are not just for show. They help them to hide from predators. The colors also help them to find food. Butterflies are very important to the environment. They help plants to grow by pollinating them. They also help to keep the balance of nature.

You can see the butterfly's feet. They are very small. They are also very important. They help the butterfly to move. They also help to keep the butterfly's body warm.
